

Controlled Thaw Operators Guide

Programme Times. P1) 6 hours. P2) 9 Hours. P3) 12 Hours.

- 1/ Plug in and switch the power on. 3 bars (- - -) will be shown in the time display.
- 2/ Press the  Sleep/On key. The programme indicator (P1, P2 or P3) will illuminate and the thawing time will be displayed.
- 3/ If the correct programme/time is displayed press the  Start/Stop key to begin thawing.
The cursor will start to flash and the time start to count down.
- 4/ If a different programme/time is required press and hold the  Set key then press the  Time/Temp key to select the required programme. Press the  Start/Stop key to begin thawing.
- 5/ When the time reaches zero the alarm sounds indicating the programme has finished and the cabinet will automatically revert to a refrigerator. To cancel the alarm press the 
Alarm Mute key. To switch off, press the  Start/Stop key.
- 6/ For further details please consult the full Operating Instruction booklet.

NOTE: A metal tray is located beneath the cabinet held in place by metal retainers. The purpose of this tray is to catch any excess water, juices etc. that melts from the thawed products. The tray should be removed, with care to avoid spillage, each day. It should be emptied and cleaned thoroughly. When clean replace the tray beneath the cabinet ensuring it is located correctly in the retainers.
